Lab Setup Tutorial

- You want to have an EECS account first. You could email staff@eecs.tufts.edu to request an account.

- What you want to do:
  - Set EECS SSH access

For Windows: (MobaXterm)
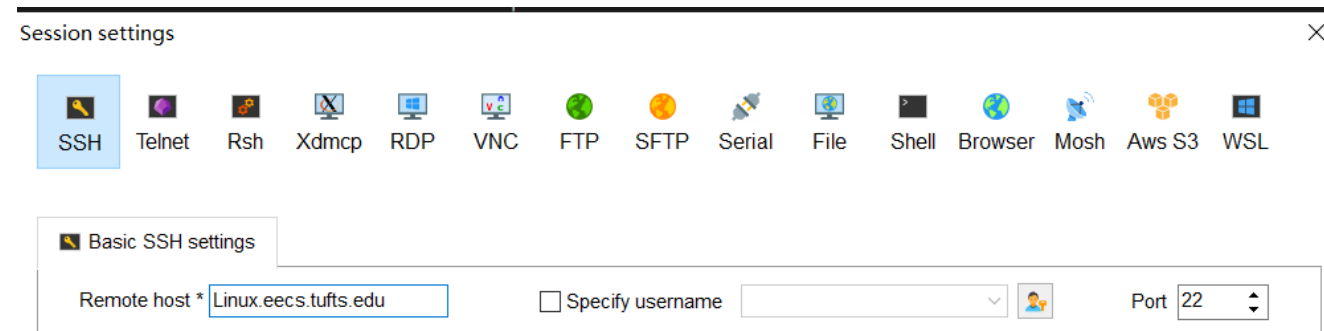

For Mac: (XQuartz) ssh -X YOUR_ID@Linux.eecs.tufts.edu

for example: ssh -X kzhang11@Linux.eecs.tufts.edu

What you want to do

- You want to have an EECS account first. You could email staff@eecs.tufts.edu to request an account.

- What you want to do:

  - Connect to the "quasar" server:

    ssh –X quasar

  - Use and load modules:

    module use /usr/cots/modulefiles

    module load licenses/synopsys tools/hspice/K-2015.06-3

  - Check the loaded modules:

    module list

```
dell52{kzhang11}390: module use /usr/cots/modulefiles
dell52{kzhang11}391: module load licenses/synopsys tools/hspice/K-2015.06-3
dell52{kzhang11}392: module list
Currently Loaded Modulefiles:
 1) licenses/synopsys    2) tools/hspice/K-2015.06-3
```

What you want to do

- Use "xeyes" to test if the pop up works:
xeyes

- Pop up the GUI interface of Waveviewer:
use synopsys
wv
